

I enjoy listening to my Satelle radio (xmradio) . There coverage fortraffis & weather is pricless. The overall selection of music when I want it is a pleasure. No commercials, No nonsense. I enjoy it so much that I have 3 units.And am considering installing a 4th in my vacation home. It is about time that the radio industry had some competition, After all they ruled the FM & AM channels for a number of years. Conventional radio is worthless.
